

▼ **THIS NEW CPVC PIPE HANGER SYSTEM** features enhanced thermal properties making it ideal for fire protection applications. It allows for vertical adjustment and limited movement in the piping system. It is easy to install as no pre-drilling is required. One- and two-hole pipe straps, side-mount straps and stand-off straps are available. A beveled edge design helps protect against rough surfaces.

▼ **THESE NEW 2400 SERIES CIRCULATORS** are maintenance-free. They are designed for quiet, efficient operation in a wide range of medium to high flow/head applications, including hydronic heating, chilled water cooling and hot water recirculation. The space-saving, close-coupled motor features permanently-lubricated bearings and a carbon/silicon-carbide mechanical seal for reliability in a wide variety of uses. They are offered in cast iron or stainless steel for a broad range of large residential and commercial uses.

▲ **THE FREESTYLE LINEAR DRAIN** adds substantially to creativity in shower design. A single slope allows for the use of a large profile tile, making the drain ideal for contemporary, barrier-free designs and wheelchair-accessible showers. The drain is made from a single piece of plastic (PVC or ABS) with no seams. The membrane clamping mechanism ensures a watertight connection.
